1. The first part of the paper is devoted to a general discussion of the problem of the existence of a solution of the system of equations (1) for arbitrary values of the parameters α and β . It is shown that the system has a solution for arbitrary values of the parameters α and β if and only if the condition $\alpha + \beta = 1$ is satisfied.

2. In the second part of the paper the problem of the stability of the solution of the system of equations (1) is considered. It is shown that the solution of the system is stable for arbitrary values of the parameters α and β if and only if the condition $\alpha + \beta = 1$ is satisfied.

3. In the third part of the paper the problem of the asymptotic behavior of the solution of the system of equations (1) is considered. It is shown that the solution of the system tends to zero as $t \rightarrow \infty$ for arbitrary values of the parameters α and β if and only if the condition $\alpha + \beta = 1$ is satisfied.
